

D3-C

DEPOSENS® 3 Controller

Control device for up to 2 sensors

FEATURES:

DEPOSENS® 3 controller is the central unit for controlling of DEPOSENS® 3 sensors. With this unit sensors can be parameterized, measurement values displayed, saved and optionally forwarded by remote query or Modbus. All operations can be done via touchscreen.

TECHNICAL DATA:

Dimensions: L x W x H:	179 x 199 x 106 mm
Enclosure material:	ABS, PC, CR
Enclosure rating class:	IP65
Enclosure color:	Light grey
Data storage:	SD-card
Power supply:	230 V AC 50 Hz
Power consumption:	50 W
Signal inputs:	2 x 4-20 mA passive or limit contact
Signal outputs:	2 x 4-20 mA active
Power output:	24 V DC
Ambient temperature:	0°C ... 60°C
Storage temperature:	-10°C ... 60°C
Weight:	1 kg
Mounting:	wall brackets / DIN-rail

INSTALLATION:

Install the controller by using the wall brackets or DIN-rail brackets on a plane vertical surface close to the sensors.

Unplug power supply before (dis)connecting controller and sensors!

ACCESSORIES / OPTIONS:

Enclosure color:	Anthrazite
Protection housing:	Steel or ABS
Remote query:	LTE-Modem
Bus interface:	Modbus

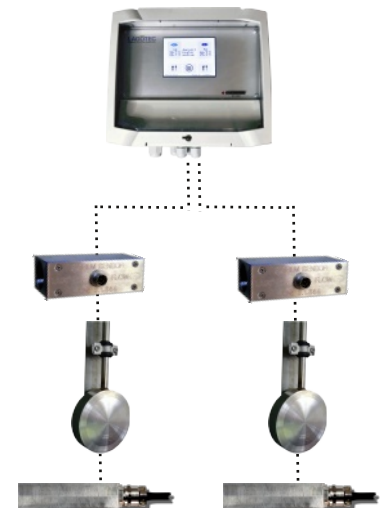

APPLICATION:

Essential for using all kind of DEPOSENS® 3 sensors. Recording and forwarding of sensor signals and external signals.

POSSIBLE COMBINATIONS:

The controller can operate one or two sensors of any kind.
